

Software Development & Integration

Build. Integrate. Automate mission-critical systems.

Client Outcomes

- Delivered secure, government-ready applications optimized for performance and compliance.
- Reduced manual workload through automation scripts and custom integrations.
- Improved system interoperability and data accuracy through API-driven architecture.

What We Deliver

- **Custom Software Development:** Design and build web, desktop, and mobile applications tailored to government and enterprise needs.
- **Systems Integration:** Connect legacy and modern platforms using secure APIs and middleware solutions.
- **Automation & Scripting:** Develop custom scripts, workflows, and robotic process automations to enhance efficiency.
- **Data Migration & Transformation:** Plan and execute structured data transfers with validation and minimal downtime.
- **Operational Dashboards:** Build visual dashboards for command-center insights, KPIs, and real-time analytics.

Differentiators

- Full-stack expertise spanning front-end, back-end, and cloud technologies.
- Secure-by-design coding practices aligned with NIST and OWASP standards.
- Agile, sprint-driven approach with continuous integration and testing.

Relevant Credentials

UEI: MJLTUE5UMAA8

CAGE: 9LSB5

NAICS: 511210, 518210, 541511, 541512, 541513, 541519, 238210

Small Business

Representative Past Performance

- **Enterprise Portfolio PMO:** PMO stand-up with EVM reporting; **Impact:** improved schedule visibility and risk control.
- **Cloud Migration Program:** Multi-workstream planning & governance; **Impact:** phased cutovers with zero critical outages.
